

CANDY DIALOGUE ENGINE

Effect Players Customization

1.0.0

Effect players are used for playing visual effects, using an AnimationPlayer node, through dialogues.

Nodes

Root

The root node can have any desired name.

Required Nodes

The following node is required:

AnimationPlayer

- Plays the animation.
- Script pointer: `@onready var effect_player`

Script

Base

The script `Effect_Player.gd` should be attached to the scene's root node.

Variables

default_z

The default z_index value for the effect player. Must be higher than the values of the dialogue box, subtitles, speech bubbles and any other such UI elements for displaying dialogues.

Other variables in the script are used internally and must not be modified.

Functions

The various functions are designed to work with the various Candy DE \$Effect commands. They should not be modified.

Signals

The AnimationPlayer's `animation_finished()` signal must be connected to the `_on_animation_finished()` function inside the AnimationPlayer's script.
